

LEARN TO MAKE MUSIC FROM REPURPOSED MATERIALS!

Musician Trio Kit at ScrapsKC

Music can be made with your voice humming or singing, your hands tapping or clapping, or with the sounds made on instruments. Tune in to your inner musician to make a rubber band guitar, drum, and rain stick in this kit! What different sounds can you create?

To make the guitar, you need to cut out an oval or circle from the middle of the box. Poke a hole with the Golf T and cut along the line. Decorate your box, then stretch the big rubberbands around the box. Add sticks to lift the rubber bands off the top of the box.

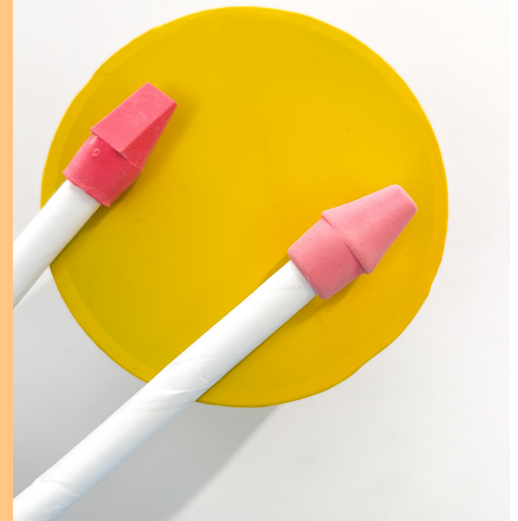

To make the rain stick, cut the neck off of two balloons. Stretch the round part of the balloon over the edge of the smaller cardboard tube. Secure the edge with tape. Twist pipe cleaners into spirals and place inside the tube. Add rice. Stretch the other balloon on the other end of the tube to seal it and secure with tape. Decorate with stickers or yarn. Turn the tube to make the rice rattle.

For the drum, use another balloon top to stretch on one side of the larger cardboard tube. Add tape to secure. Make sticks by putting the erasers on the ends of the straws. Decorate with tape, stickers or yarn!

Can you make a rhythm? Can you make loud and quiet sounds? Write your own song! Practice and perform for your friends and family.
