

START SEWING WITH EMBROIDERY

Hand Stitch Embroidery Craft Kit

Embroidery is the art of adding decorative elements to fabric. It is an ancient craft that has been developed in a variety of styles throughout the world. This kit is a beginning embroidery activity. Embroidery sometimes follows a drawing or pattern, but this kit is open for whatever stitches you want to try or create.

See our [Detailed Instruction Sheet](#) for a step by step guide!

Start by setting up your embroidery hoop. Stretch your fabric over your inner hoop by pressing the outer hoop down around the fabric and inner hoop. Make sure the fabric is taught and tighten the screw.

Choose a yarn color and thread your needle. Use a narrow rectangle of paper to help you thread your need. Fold the paper around the yarn and thread through the eye. Tie a big knot at the end of the yarn.

Begin stitching up from the backside. Be careful not to loop your yarn around the side of the embroidery hoop. Add a variety of stitches, different color yarn, and beads to make your embroidery unique. Every yarn section needs to be knotted at the end and tied off when you are done.
